

RefShare

A new tool for the Web dissemination and publication of databases and bibliographies

RefShare is an add-on module to RefWorks that provides users with a quick and easy way to share their database (or folders) further enhancing collaborative research. Users can share their RefWorks references with both members of their own institution and globally with any researcher having Internet access.

How it Works

- RefShare allows the subscribing institution to make available a central, customizable Web page where users can post their RefWorks databases or folders.
- The databases are easily accessible from the site; users can also easily share access to this information with anyone via e-mail.

Features of RefShare

- Users control access of their data with a variety of options.
- Viewers can search, download, print, export, and contact the original author by e-mail.
- Access can be limited to a particular community of users.
- Research information is easily accessible by a global audience.

Uses of RefShare

- Post class reading lists on a central Web page
- Provide easy access to information for disparate researchers collaborating on a project
- Create and share databases of frequently-requested reference queries by topic
- Provide a linkable database of research done by specific faculty members
- Publish an internal database of references for easy sharing within your institution

Benefits of RefShare

- Facilitate dissemination of information by having a central Web page for the posting and access of research information
- Provide a collaborative research environment using the capabilities of easily accessible data via the Internet
- Enables the seamless sharing and exchange of information
- Allow easy transfer of information between RefWorks databases
- Centrally post frequently-needed databases of materials for research queries, class assignments, or research review
- Provide easy remote access to research and collaboration globally

About RefWorks

RefWorks is a Web-based bibliographic management tool that allows users to build and modify personal databases of annotated bibliographic references.

Users access their personal RefWorks database from any Internet-connected computer. References can be imported from hundreds of compatible databases or entered manually.

Additional information about RefWorks is available at www.refworks.com.
