RefWorks Announces New Linking Partnerships with LexisNexis[®], NuriMedia, CAIRNS, and TDNet

BETHESDA, MD, USA (November 2007) – RefWorks LLC, the leading provider of web-based research management, writing and collaboration services for the academic and research communities, has partnered with a number of online services to provide an export from their platforms into RefWorks. These new partnerships will now allow users to export search results directly into a RefWorks account with the simple click of a button. This direct export link will expedite the research workflow process tremendously, automatically transferring data from one service to another seamlessly.

“RefWorks has done a substantial amount of work to make the export finally possible. We rely on RefWorks’ expertise to parse the data we export and the benefit of this new capability is tremendous for our users,” noted Alistair Morrison, Product Manager, LexisNexis[®] Academic.

“We are really excited that LexisNexis chose to partner with us in providing this linking capability. There has always been a strong link between STM publications and research management tools such as RefWorks. These strong links did not exist for users of Business and Legal publication services---until now,” noted Colleen Stempien, President, RefWorks LLC.

In addition to the linking partnership with LexisNexis[®] Academic, RefWorks is also pleased to announce new partnerships with 3 other online database providers: DBPIA, CAIRNS and TDNet. DBPIA, produced by NuriMedia, is a Korean language database covering 600 publications in such fields as literature, economics, business, theology, law, administration, arts, engineering and natural science. For more information on NuriMedia and its publications, visit: www.nurimedia.co.uk. CAIRN, a French language database, indexes 65 current periodicals in the humanities and social sciences disciplines and provides full-text access to over 126 French journals. Primary topics include economics, politics, public affairs, sociology, education,

psychology, history and geography. For more information on CAIRN, visit: www.cairn.info. TDNet is a leading provider of e-resource management solutions managing internal repositories and external sources. Its products include Searcher Analyzer, Journal Manager, TOUR Full-Text Resolver and Holding Manager. For more information on TDNet and its services, visit: www.tdnet.com.

About RefWorks

RefWorks is an international company that provides research management solutions, helping researchers become more effective in their work by aiding in the management, organization, collaboration and dissemination of research information. Thousands of researchers in over 900 organizations globally use the RefWorks service daily. Founded in 2001 by a team of experts in the field of bibliographic database management, RefWorks supports hundreds of online databases and output styles covering a broad range of subject areas. RefWorks collaborates with some of the world's most prestigious online information service providers including ProQuest, BioOne, EBSCO, Elsevier, HighWire, H.W. Wilson, ISI, OCLC and Ovid, to name a few.
